

# Collaborative Curation Model

## 01 Community Planning

Document and understand community needs and goals by discussing research areas, topics for programming, and ideas for collaborative projects.

## 02 Collections Research

Understand what the repository has and how it is organized.

## 03 Community Consultation

Consult with your community or communities about the information you have gathered through your research.

## 06 Gather or Create Digital Copies

Digitize materials or copy digital surrogates of original materials.

## 05 Content selection

Create a prioritized list of collections and items based on your repository visits.

## 04 Repository Visits

Visit repositories in person or work with repositories online.

## 07 Content Review

Review content and metadata that you have digitized or received.

## 08 Access Decisions

Plan and make decisions on how to provide appropriate access to content.

## 11 Share, Engage, Review

Share content in your community and engage with others in appropriate ways.

## 10 Community Review

Meet with with community stakeholders to review the new community metadata.

## 09 Gather and/or Create Community Metadata

Work with community members to gather knowledge, memories, stories, historical information, and other information and metadata about content.
